THE **LINUX** FOUNDATION TRAINING

LFW211: Node.js Application Development

Welcome to Linux Foundation E-Learning Training

2020/09/03   Version 8.8

If you have any further questions after reading this document, the answer may be found in the FAQ on the website:
http://bit.ly/LF-FAQ or http://training.linuxfoundation.org/linux-courses/general-information-and-faq

1   Hardware Requirements

Students are expected to **provide their own computers** for **Linux Foundation** courses.

The Operating system on your computer doesn't much matter as you will only be using it to access another service remotely or within a VM or container.

The Linux Foundation logistical staff may be consulted as required for further clarification.

2   Software Requirements

Table 1: **Software requirements for LFW211: Node.js Application Development**

Internet Access	Required
Virtual Machine	Acceptable
OS required for class	Linux, MacOS, Windows
Required SW for class	modern web browser, terminal emulation program (ssh or putty)

You will need the following things on your Operating System of choice: modern web browser, terminal emulation program (ssh or putty)
